PROFESSIONAL SUMMARY:

IT Project Manager with experience delivering global digital transformation projects, coordinating cross-functional teams, and driving business change in complex, international environments. Skilled in project planning, stakeholder management, process improvement, and translating business needs into scalable digital solutions.

At Hoffmann-La Roche, I currently lead business enablement for the ASPIRE SAP transformation, supporting over 3,000 end users in Switzerland. I coordinate stakeholders across multiple business areas, oversee governance and role mapping activities, and ensure successful adoption through structured change and knowledge management.

My background combines project delivery, agile ways of working, and digital innovation. I enjoy bringing people, processes, and technology together to deliver practical solutions that create measurable business value while improving efficiency and user adoption.

Recent:

2025-2026 Writing Masters Thesis

WORK EXPERIENCE:

IT Project Manager

Hoffmann La Roche, Diabetes Care
2022-2024

- Led cross-functional teams in Indianapolis, San Cugat, and the UK as Scrum Master.
- Managed the development of a REST API harmonization tool for the learning department.
- Implemented agile methodologies to improve project workflows and team collaboration.
- Collaborated with cross-functional teams to gather requirements, plan project timelines, and deliver high-quality software solutions within budget constraints.
- Provided foundational SAP knowledge to align training with business processes.

Digital Content & Operations

- Digital service design & scaling
- Content operations & delivery models
- Process optimization & governance
- KPI tracking & reporting

Platform & System Governance

- SAP (ASPIRE transformation context)
- Digital platforms & internal tools
- Workflow design & process alignment
- Metadata & structured content thinking

Service Delivery & Leadership

- Leading cross-functional teams
- Managing internal & external stakeholders
- Training strategy & enablement
- Coaching & knowledge transfer

Agile & Transformation

- Scrum / SAFe
- Agile delivery models
- Global rollout strategies
- Change management

Technical Skills

- Python, SQL, JavaScript
- REST APIs
- Git
- AWS (basic)

WORK EXPERIENCE:

Hoffmann La Roche

May 2024 - July 2025

- Managed training for over 3,000 end users in Switzerland.
- Coordinated training content and learning materials across multiple teams.
- Led the Train-the-Trainer program to ensure consistent knowledge transfer.
- Supported role mapping through effective stakeholder management.
- Provided foundational SAP knowledge to align training with business processes.

Digitization Project Manager

University of Basel

2020-2022

- Led Digitization Orders Swiss wide
- Implement order from processing of digitized materials—from digitization, sorting, and post-processing to metadata creation.
- Implemented agile methodologies to improve project workflows and team collaboration.

Additional Strength

- Strong stakeholder management across global organizations
- Experience in large-scale transformation programs
- Ability to align business, content, and technology
- Structured, analytical, and solution-oriented mindset

Bioinformatics Exploration: BRCA1 Mutation Analysis

Bioinformatics Project

Explored computational methods for analysing mutation patterns in BRCA1 gene sequences using Python-based data analysis.

Focus areas included:

- Processing biological sequence data
- Identifying mutation patterns
- Applying computational methods to biological datasets
